\$80,300.00
\$88,235.00

Recommended Quote or Bid:

Belair Sitework Services

\$79,702.00

General Information:

This project will remove contaminated soil that was deposited with the soil remediation project in 1998. The soil is contaminated with low levels of lead and was left onsite to save money at the original time of cleanup. The soil removal will allow for additional outside work area for the Public Works and Park Maintenance Staff; the area is approximately 100' by 140'. This area will be used for recycling roadway materials that are generated from typical work activities such as watermain breaks or park improvement projects. Tests performed on the adjacent pond do not indicate any contamination of the pond water. This project will be completed in December. The 2012-2016 CIP allocated \$200,000 for this project.
